**Q** How do I prevent my under-eye bags from darkening and swelling?

**A** Under-eye bags are caused by a combination of factors, including genetics, age, and lifestyle. To prevent them from darkening and swelling, you should use a combination of eye cream and eye drops. Eye cream should be applied to the skin around the eyes, and eye drops should be used to soothe the eyes.

Under-eye bags are also caused by a combination of factors, including genetics, age, and lifestyle. To prevent them from darkening and swelling, you should use a combination of eye cream and eye drops.

**What are you wearing?**  
My top is from Zara and my skirt is from Mango. I love Zara and Mango for their styles. I also love Zara and Mango for their styles.

**Describe your sense of style.**  
I am normally dressed quite formally for work but like to dress more casually on weekends. I like to dress comfortably in professional attire that I can wear to work.

**Do you think you are good looking?**  
Thank you very much! I think I am pretty good looking. I would love to hear from you.
